

The Convection Oven Catalog

www.moffat.com

Convection

Moffat Turbofan Convection Ovens offer several advantages over traditional convection ovens.

1 Style

Fresh styling provides contemporary design for front of house use and the benefits of quiet, low velocity convection cooking - providing cooking time reductions of up to one third, lower cooking temperatures, and greater throughput with less shrinkage and moisture loss.

2 Features

Feature options available within the Moffat Turbofan range include roast and bake timers, steam or water injection, and cook-n-hold.

All ovens have easy clean vitreous enamel oven liners, and an easy to use functional control layout.

3 Compact

The compact footprint offered by Turboten ovens allows our ovens and proofers to be installed in restricted conditions offering greater production capabilities of full size sheet pans.

By using less kitchen floor space, Turbofan ovens allow more room for merchandising or other production equipment.

Units can be countertop mounted, or positioned with our range of special stands. Baking and cooling racks are also available. The equipment can also be double stacked for installations requiring even greater throughput.

Applications

Moffat convection ovens are designed for commercial use in such varying applications as convenience stores, chain restaurants, hotels, independent restaurants, schools, grocery and supermarkets, bakeries, mall kiosks, and specialty user applications. They are currently used in more than 50 countries for general purpose or specific dedicated functions.

Baking

Standard features for Moffat Turbofan applications include 60-minute timers, water injection, low velocity fans, and full view insulated glass doors (assisted by lights). Companion proofer cabinets for the Turbofan 32 and 35 series ovens are also available for creating a consistent environment for scratch and frozen dough products.

Roasting

For roasting applications, units include easy clean vitreous enamel oven liners and three hour timer backed up by a cook n hold facility. Moffat Turbofan ovens reduce roasting times by up to one third and are able to significantly reduce shrinkage and moisture loss.

Speciality chicken roasting racks are available to complement the Turbofan 32 and 35 series ovens as an alternative to expensive to operate and difficult to clean rotisserie systems.

The styling of the Moffat Turbofan is designed to ensure clean lines, easy to use controls and optimum function for the user to achieve consistent results.

Turbofan Floorspace Footprints

Moffat ovens offer five compact footprints.

Model E35 Compact 345/8" x 345/8" in single countertop, double stacked, or companion proofer mounted units.

Model E32 or G32 Compact 28" x 32" in single countertop, double stacked, or companion proofer mounted units.

Model E27 37¹/4" x 28¹/4" single countertop or double stacked units.

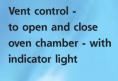

Model E31 31³/8" x 23⁵/8" single countertop unit.

Model E25 28³/8" x 23⁵/8" single countertop or double stacked units.

User Friendly Controls

The unique Moffat curved control layout - functional, clean and straightforward. (Model E35 shown)

Solid state variable thermostat - easy to set and review

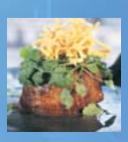

60 minute bake timer - with continuous buzzer at cycle end

Water injection

Fan High and Fan Low speed settings

Power On *I* Off switch and indicator light

Easy clean durable vitreous on steel graphics

The largest model from Moffat includes state of the art controls and features which address current industry application needs such as faster recovery, more even and accurate baking, greater capacity, and flexibility.

A small floorspace footprint 34⁵/₈" x 34⁵/₈" has been maintained with innovative features like a field reversible door, closed chamber cooking, and Moffat's dual direction fan. The E35 is a sensational bakery, bake-off, general purpose, regeneration and roasting oven.

Oven

E35 / A26

Single ovens can be mounted on the custom A26 stand.
Constructed entirely of stainless steel, the stand includes runners to hold up to 6 full size sheet pans.

- 6 full sheet pan capacity (8 with cookie kit option)
- Stainless steel exterior
- Insulated easy clean porcelain interior
- Solid state thermostat
- 60 minute bake timer
- Hot reversing air fan system
- Time driven steam system
- Two speed fan
- Field reversible door
- 3 phase (single phase to special order)
- Plug in door seal
- Optional stainless door with viewing window

god. sunwayinfo. com. cn

In compact applications, the E35 can be double stacked to provide extra capacity. Because this can be done in the field, units can be added as demands grow.

E35 / E85

Our high capacity bake-off system includes the E85 proofer with 8 or 12 sheet pans of proofing capacity, in a controlled heat and humidity environment.

The most versatile electric convection oven available, able to accommodate 4 - 6 full sheet pans in a 28" x 32" floorspace footprint.

These commercial ovens feature controls making them ideal for baking, roasting, holding and dedicated product functions. Low velocity fans, low power usage, and stylish design make them easy to install and utilise in front of house applications or in kitchens where these units will cook fast, be easy to clean, and easy to service.

Convection
Oven

E32 / A25

Single ovens can be mounted on the custom A25 stand. Constructed entirely of stainless steel, the stand includes runners to hold up to 12 half size sheet pans, or 6 full size sheet pans.

Cook n Hold

4 full sheet pan capacity
(6 with cookie kit option)

- 60 minute bake timer
- \$\square 3 hour roast timer
- Cook n hold system
- Stainless steel exterior
- Insulated porcelain interior
- Twin pane glass doors
- Dual internal lighting
- Water injection
- Hot reversing air fan system
- Optional computer controller
- Field reversible door

E32C

Featuring computer controller with graphical recipe display, multi stage cooking, individual shelf control, cook time compensation and optional infra red programming.

E32 / 2

In compact applications, the E32 can be double stacked to provide extra capacity. Because this can be done in the field, units can be added as demands grow.

E32 / E89

Moffat's compact bake-off system includes the E89 proofer and holding cabinet, with 8 pan capacity, in a controlled heat and humidity environment.

The most compact gas convection oven available, able to handle 4 - 6 full size sheet pans in a $28" \times 32"$ floorspace footprint.

These commercial ovens feature controls making them ideal for baking, roasting, holding and dedicated product functions. Low velocity fans, low gas usage requirements, and stylish design make them easy to install and utilise in front of house applications or in kitchens where these units will cook fast, be easy to clean, and be easy to service.

Convection
Oven

G32 / A25

Single ovens can be mounted on the custom A25 stand.
Constructed entirely of stainless steel, the stand includes runners to hold up to 12 half size sheet pans, or 6 full size sheet pans.

- Unique gas infra red burner
- 4 full sheet pan capacity (6 with cookie kit option)
- 60 minute bake timer
- 3 hour roast timer
- Cook n hold system
- Stainless steel exterior
- Insulated easy clean porcelain interior
- Twin pane glass doors
- Internal lighting
- Water injection
- Field reversible door

Infra Red Burner

Moffat's unique steel infra red burner is more efficient, more intense, and burns less gas than traditional blue flame burners. A fast heat up time with fast recovery.

G32 / 2

In compact applications, the G32 can be double stacked to provide extra capacity. Because this can be done in the field, units can be added as demands grow.

G32 / E89

Moffat's compact bake-off system includes the E89 proofer and holding cabinet with 8 pans of proofing capacity, in a controlled heat and humidity environment.

This versatile countertop convection oven can be used as the primary oven in kiosks and smaller throughput applications, or as a dedicated product oven in higher throughput installations. Its compact size and limited kW requirements make it ideal as a remote cooking piece.

A truly versatile oven which will bake, roast, hold, and broil.

SUITWAYITH

Versatile full sheet pan convection oven designed to provide a fast, even bake. Moffat's specially designed baffle system and reversing fan system evenly distributes hot air around the oven, eliminating the need to turn pans.

The E27 is able to provide an exceptional result with a wide range of fresh, par-baked and pre-proofed frozen doughs including French sticks, baguettes and dinner rolls.

The oven is also ideal for baking croissants, Danish pastries, flat breads, nozen pizzas, chicken, cookies and other cake and conjectionery products.

- 60 minute bake timer
- Stainless steel exterior
- Insulated easy clean porcelain interior
- Toughened twin pane glass door
- Internal lighting
- Mechanical thermostat variable between 120°F to 480°F
- Drop down door
- **S** Optional computer controller

E27 / A28

Single ovens can be mounted on the custom A28 stand. Constructed entirely of stainless steel, the stand includes runners to hold up to 12 half size sheet pans, or 6 full size sheet pans.

Compact and versatile two tray Turbofan plug in (15 Amp) oven. For the very best results in cafes, coffee shops, small restaurants, convenience stores and takeaways.

The E25 is ideal for cookies, muffins, Danish pastries, biscotti, breads, cakes, baked potatoes, frozen pizzas, roast chickens, and many other snack or takeaway foods.

The compact design and the versatile, simple 110V, 15 Amp power supply make the E25 an ideal countertop support oven as well as being ideal for outside catering.

^{*} All single phase units can be used on 3 phase supply by splitting one off. Detailed specification applies to individual ovens only. Detailed specification sheets are available on all of the above models.

Moffat Convection Ovens are distributed and warranted by the manufacturer, and have been extensively sold in North America since 1985. These compact and fully featured products provide solutions to the foodservice and bakery industry, available through established local equipment dealers, with warranty and service provided through a network of professional service agencies.

SAME DAY SHIPPING

Ovens are carried by local dealers, and inventory carried in Winston-Salem, North Carolina, means ovens can ship on the same day orders are received - with transit times normally being 4 -5 working days. Moffat offers a flat rate shipment rate - with direct drop ship available.

WARRANTY

Moffat Ovens carry a 12 month parts and labor warranty - supported by a network of local parts stockists and service companies. We also offer a toll free customer service line to make getting help in ordering or operating your Moffat product simple. Just call 1 800 551 8795 and our customer service staff will assist you.

APPLICATIONS

Because of the features, compact footprint and styling, Moffat convection ovens can be found in varying applications such as convenience stores, chain restaurants, hotels, independent restaurants, schools, grocery and supermarkets, bakeries, mall kiosks, and specialty user applications. Unique styling makes for attractive and functional front of house presentation.

SPECIFICATION SHEETS

Detailed specification sheets are available for all Moffat models. These sheets provide full specifications including elevation, plan and dimensions, power, water and gas inputs as well as details on ratings and options.

Designed and manufactured by ISO 9001 QUALITY ISO 9001 QUALITY AMANAGEMENT STANDARD

ISO9001

All Turbofan products are designed and manufactured by Moffat using the internationally recognised ISO9001 quality management system, covering design, manufacture and final inspection, ensuring consistent high quality at all times.
